3. Add yourself to the session

- DGIWG has developed profiles of OGC Web Services of the years
 - Presentation about WMS and WFS profiles will be made during the closing plenary
 - And we do have a related topic for today...
- One finding has been made when discussing profiles with NATO
 - => **POST/XML requests for WMS 1.3 are not defined by XSD**

XSD Schemas for WMS 1.3 requests : issue description OGC

- WMS 1.3 require implementation of Get/KVP binding for all of the supported operations, but POST/XML may also be used
- WMS 1.3 standard and schemas (<http://schemas.opengis.net/wms/1.3.0/>) only defines XSD for GetCapabilities response and exceptions
 - **No XSD for GetCapabilities/GetMap/GetFeatureInfo requests**
- **Some findings**
 - http://portal.opengeospatial.org/files/?artifact_id=1118 seems quite old (only draft DP? and no online schemas is available)
 - <https://gis.stackexchange.com/questions/127360/does-xsd-for-wms-1-3-0-request-exist> proposes to use the GetMap XSD defined for SLD WMS 1.1 (but what bout other operations ?)
 - Other places you can find information
 - <https://schemas.cubewerx.com/schemas/wms/1.3.0/> (all schemas for WMS 1.3)
 - <http://schemas.deegree.org/extensions/services/wms/1.3.0/> (schema for GetFeatureInfo)

XSD Schemas for WMS 1.3 requests : issue description OGC

- Looking for an official OGC response to this issue...
